Price: **2,00 €**

Free Samples Copper Sulfate cas7758-98-7: In the chemical industry, it is used to manufacture other copper salts such as cuprous cyanide, cuprous chloride, cuprous oxide and other products. In the dye industry, it is used as a copper complexing agent for the production of copper-containing monoazo dyes such as reactive brilliant blue, reactive violet, phthalocyanine blue, etc. It is also a catalyst for organic synthesis, spices and dye intermediates. In the pharmaceutical industry, it is often used directly or indirectly as an astringent and an auxiliary raw material for the production of isoniazid and pyrimethamine. In the coating industry, it is used for copper oleate as a poison for antifouling paint on the bottom of ships. In the electroplating industry, it is used as an additive for sulfate copper plating and wide-temperature full-bright acid copper plating. In food grade, it is used as an antimicrobial agent and nutritional supplement. In agriculture, it is used as an insecticide and copper-containing pesticide.
